

HOSTILE MRB ? MODE 2 MOOT + SEAL/FILE (2026-09-19)

Session: Bob (cm-bob chair) + Oscar (cm-oscar) + Spider (cm-spider) on #cm-bob-oscar

Host: IONOS

Moot id: 47e6b0ca63b9b2dd

Code tip: 70f85ab

Offline suite: 81 passed, 2 skipped (unchanged this pass).

Verdict

PASS-with-nits for live mode-2 field exercise (3-nick moot + multi-party SEAL + FILE tier S).

Not ready to claim moot state-machine complete: chair roster after JOIN stayed {cm-bob} only. Hand remaining bugs to a build agent.

Evidence (live)

Moot

Step	Result
------	--------

oscar ? spider mode2-file-b.txt INFO file DONE id=63ea1e9d053ed590 ok

bob ? oscar first mode2-file-a.txt OFFER seen; no DONE

bob ? oscar retry mode2-file-a2.txt INFO file DONE id=67bcd11a32cba7fb ok

Blockers / required fixes for build agent

-
1. Moot roster on chair ? after JOINA from other nicks, chair moot/<id>.json roster must include joiners (and seq/floor transitions). Today only chair remains on roster.
 2. Chair transcript completeness ? bob moot/<id>.txt nearly empty vs oscar/spider transcripts; wire APPLY should append OPEN/JOIN/FLOOR/SAY/YIELD/CLOSE on all participants including chair.
 3. FILE tier S flake ? first bob?oscar OFFER did not complete; retry succeeded. Find race (ACCEPT not sent, DONE before bag ready, outbox flood).
 4. Add offline tests locking (1)?(2) without Libera.

Nits

- Duplicate CLOSE lines in spider transcript.
- YIELD * vs chair prose still open from earlier gap list.
- Agent INFO does not always log JOIN/FLOOR verbs (only OPEN).

Pass bar met

- Three agents on one private channel with TOFU pins.
- Floor moot OPEN ? SAY under floor ? CLOSE.
- SEAL among all three directed pairs tested.
- FILE tier S works at least oscar?spider and bob?oscar (retry).

Bob: mode-2 PASS-with-nits. Queue build agent for roster/transcript/FILE flake.
