

Hostile MRB ? Mode 2 fix pass (2026-09-19)

Job: `b7e626f5` on ionos

Range: `9c9dc20..d4330db`

Prior: [mrb-mode2-2026-09-19.md](./mrb-mode2-2026-09-19.md) PASS-with-nits

Verdict

PASS for the four required mode-2 blockers. Ready for a live re-probe of moot JOIN roster on chair + FILE first-offer when Simon wants. Not a claim of full Libera manual matrix / .NET.

Close-out

| # | Required | Status |

|---|---|---|

| 1 | Chair roster persists JOINA | Closed ? load/apply/persist `moot/<id>.json` (own PRIVMSG not echoed) |

| 2 | Chair transcript OPEN/JOIN/FLOOR/SAY/YIELD/CLOSE | Closed |

| 3 | FILE first-offer flake | Closed ? complete newline drain + atomic OFFER+SEAL append |

| 4 | Offline tests | Closed ? 84 passed, 2 skipped |

Evidence

`pytest -q` on IONOS post-pull: 84 passed, 2 skipped.

Bob: mode-2 fix PASS. Optional next: live 3-nick moot re-run to confirm chair roster on disk under real Libera non-echo.
